

APPENDIX 5_INTERVENTION MIX

RESPONSES						
	Barriers		CT Response (to households or individuals)	Direct assistance (in kind / service delivery)	Context-specific BCC response	Basic services strengthening response (supply)
Underlying factor: Households food security	Economic	A balanced and adapted diet is not affordable financially speaking	CT for the purchase of nutritious foods (fresh foods), items for preparation and / or transport towards markets, by taking into account the satisfaction of basic needs (unrestricted CT + fresh food vouchers for instance)		If bad practices or low capacity identified : complete CTs by BCC to ensure a proper use/conservation/ distribution of foods within the household, IYCF. BCC may also focus on budget management, and a complementary awareness-raising may be considered to facilitate the distribution process (familiarization with the distribution system)	Coordinate with actors working on production sectors and market systems enhancement to facilitate access to its commodities at an affordable price
	Structural	A balanced and adapted diet is not physically accessible	Consider CTs for a safe carriage if there is a security problem. In the absence of sellers is due to low demand, injecting CTs may boost the settlement of local sellers. If there is an infrastructure issue, CFW could help	By strengthening in parallel production and distribution systems, immediate distribution of nutritional foods	BCC to bBCC to ensure a proper use/conservation/distribution of foods within the household, IYCF	Market actors to strengthen markets integration, link with local authorities to reinforce transportation facilities, area security.
	Behavioral	A balanced and adapted diet is not consumed under optimal conditions	CT basic needs as accelerator of behavior change, if relevant, or conditioned to participation in BCC activities		BCC to promote good practices and capacity building, IYCF	Make sure foods allowing a diversified and balanced diet are available, and availability and quality of IYCF counseling services

Underlying factor: Care practices	Economic	Access to quality care practices is not financially affordable	CT for basic needs (MPCT based on MEB), transportation vouchers or access to health centers according to analyses		If bad practices or low capacity identified: complete CTs by BCC. BCC may also focus on budget management, and complementary awareness-raising may be considered to facilitate the distribution process (familiarization with distribution system)	Advocacy for free access to health care and free of charge, development of social protection for Universal Health Coverage and coverage of related costs, investment in basic services including staff training, facilities and inputs
	Structural	Adequate care services are not available or are not operational	CTs may be considered for safe transportation if an obstacle is identified, or work with the government and connection with social nets / payments of care-givers to improve their availability	Humanitarian partnerships directly ensure service delivery	BCC to ensure a proper use of services by communities is required where services will be available	"To ensure health care availability and quality, strengthening: # at community level of IYCF services # at the level of health facilities "
	Behavioral	Available care practices are inadequate	CTs conditioned to participation in BCC activities to promote visits in free and priority preventive health services--> different ways to conceive conditionality (registration or visits) and the transfer amount (based on indirect costs or essential household needs)		"BCC to improve: # knowledge and practices of care-givers and users if necessary # the use of mental health services"	"If applicable, strengthening of health systems at community level and in health facilities to ensure: # the availability and quality of mental health services # the availability and quality of IYCF counseling services"

Underlying factor: Environnement sain	Economic	Access to WaSH services is not financially affordable	CTs for hygiene products, access to water, by addressing basic needs (unrestricted CTs + coupons for example)		BCC is necessary for the understanding/knowledge and use of Wash services, or awareness-raising to budget management/ use of distribution process	
	Structural	Wash services are not available in sufficient quality and quantity	CTs may be considered for safe transportation if an obstacle is identified,	Humanitarian partners directly ensure service delivery	BCC to ensure a proper use of services by the community if necessary where services will be available	Strengthening of Wash facilities to ensure availability and quality
	Behavioral	Inappropriate use of Wash services	Conditional CTs completing BCC to promote good practices		BCC to ensure a proper use and acceptance of services by the community	Strengthening of services and infrastructure if necessary to ensure availability and quality of WaSH access
