The background of the slide is a repeating pattern of light gray icons on a white background. The icons include: a family of three (two adults and a child), a hand holding a coin, a money bag with a dollar sign, a bar chart with three bars of increasing height, a house with a roof, and a hand holding a plant growing in a pot. These icons are arranged in a grid-like pattern across the entire slide.

Grand Bargain 2.0 Caucuses

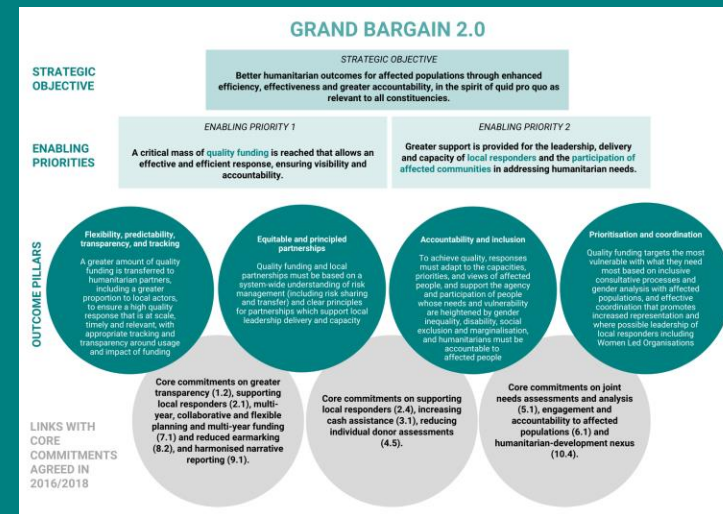

Presentation by the Grand Bargain Secretariat
15 September 2021

GRAND BARGAIN 2.0 Framework

FRAMEWORK FOR GRAND BARGAIN 2.0 ENDORSED IN JUNE 2021

FRAMEWORK ANNEX I ESTABLISHES CAUCUSES

- Introduction of political caucuses (complementary to workstreams) to unlock collective challenges, where political support is needed.
- Relevant and concerned Signatories - “coalitions of the willing” - that agree to monitor, drive and encourage progress on specific commitments at the political level

- The Grand Bargain Signatories endorsed a framework for Grand Bargain 2.0 ahead of the meeting
- While core commitments remain valid, Grand Bargain 2.0 will elevate collective efforts to the political level, and focus on the enabling priorities that are essential for achieving the objectives: quality funding, localisation, and participation of affected populations
- Risk sharing and gender as cross-cutting issues

Establishment of a caucus

- Signatories with a particular interest in or a commitment to a certain area take up specific actions from the Grand Bargain 2.0 framework and **proactively and independently** recruit other key stakeholders to work together
- **Closed format** to allow for an open and frank discussion, exchange of views, analysis of bottlenecks and decision making
- **Accountability to the Signatories - importance of regular and transparent communication:** caucuses are obliged to communicate through the Secretariat the establishment of the caucus (including problem statement etc.), progress as relevant, and outcomes
- FG and EP support – to three prioritised strategic caucuses at a time

Criteria for establishing a caucus

Caucuses are focused on very specific, elevated, and political issues that have the following characteristics:

- Political bottleneck, defined as a political trade-off among constituencies that requires specific decision-making from seniors, rather than one that involves progressing technical challenges
- Collective relevance
- Transformative potential
- Explicitly linked to the two enabling priorities and the four strategic outcomes
- Remain within the scope of the Grand Bargain workstreams and commitments and/or two crosscutting issues (risk and gender)
- Defined through a precise problem statement
- Timebound
- Include only those actors that can actively contribute to unblock the issue to allow for effective and efficient process
