

## Linking SP with H-CVA - Part 1 & Part 2

### COURSE AIM:

To promote informed and on-going dialogue between humanitarian and SP stakeholders on the ways forward for linking SP and H-CVA in given regional/country contexts.

### Part 1 Introduction

#### Aim:

To equip humanitarian stakeholders with a foundational understanding of social protection, and the potentials for linkages with humanitarian Cash and Voucher Assistance

#### Objectives:

By the end of this part of the course, participants will be able to:

- Define SP and the components that are relevant from a humanitarian perspective.
- Explain the importance of linking SP and H-CVA.
- Outline the main frameworks and approaches to making SP more responsive to shock.
- Summarise the operational options for linking SP with H-CVA.
- Identify the potential roles and entry points for different actors in making SP systems responsive to shocks.
- Provide examples of scaling up SP for humanitarian response in different contexts.
- List the potential challenges and key lessons learned for linking SP with H-CVA.

### Part 2 Design

#### Aim:

To apply practical tools for the strategic decisions and practical design considerations needed for linking SP with humanitarian Cash and Voucher Assistance (CVA).

#### Objectives:

By the end of this part of the course, participants will be able to:

- Explain the key steps and considerations involved in designing H-CVA that contribute to strengthening/developing SP systems in a country.
- Contextualize and apply tools for identifying practical options for linking H-CVA and SP in any given country.
- Clarify the roles of different stakeholders in linking SP with H-CVA in particular.
- Identify the key factors to consider in preparedness for linking SP with H-CVA.
- Suggest ways to ensure coordination on linking SP and H-CVA at country level.

# Linking Social Protection and Humanitarian CVA – Course Overview

December 2020 edition

## Agenda for Linking SP and H-CVA

Time	Day I
<b>PART I INTRODUCTION</b>	
9.00 - 10.10 70'	<b>Session 1.1 Overview of SP definitions and concepts</b> Welcome, introductions and expectations Overview of SP definitions and concepts
10.10 - 10.30 20'	<b>Session 1.2 Linking SP and H-CVA – entry points</b> Comparing SP with H-CVA
10.30 - 11.00 30'	Break
11.00 - 11.55 55'	<b>Session 1.2 Linking SP and H-CVA – entry points</b> Frameworks, rationales and options for linking SP with H-CVA Examples of linking SP with H-CVA
11.55 - 1.00 65'	<b>Session 1.3 Linking SP and H-CVA – contexts, roles and reflections</b> Complexities of context and roles of different stakeholders Challenges and reflections
1.00 - 2.00 60'	Lunch
<b>PART 2 DESIGN</b>	
2.00 – 2.50 50'	<b>Session 2.1 Steps and approaches in design</b> Entry points in the shock cycle Steps in design and management Country/Regional SP actor/focal point presentation
2.50 – 3.30 40'	<b>Session 2.2 Practical tools for linking</b> Preconditions and assessments Determining the systems status - applying to a context (options A, B, C*) with Evaluating Delivery Systems Matrix
3.30 - 4.00 30'	Break
4.00 – 4.45 45'	<b>Session 2.2 Practical tools for linking</b> Strategy Decision Matrix - applying to a context (options A, B, C*)
4.45 - 5.30 45'	<b>Session 2.3 The way forward with linking</b> Preparedness considerations and steps Coordination
	End

## Part I Introduction and Part 2 Design

### \* Country case context options A, B, C

A: Generic case study

B: Country case study drawn from participants' country context and prepared by facilitator

C: Case study adapted from the regional context and prepared by facilitator
